

# CONVEYOR SYSTEMS

[mhsglobal.com](https://mhsglobal.com)

# Efficiently automate

# PRODUCT MOVEMENT

With operations facing more SKU and packaging variety and ever-increasing throughput requirements, conveyor systems must be flexible and provide long-lasting, reliable performance to fuel critical supply chain functions.

From greenfield projects to retrofits, MHS designs, manufactures and integrates roller- and belt-driven conveyor and singulation solutions to match your exact requirements and keep downstream automated processes moving efficiently.

## **EXTENDABLE LOADER/UNLOADER**

Load and unload items at the dock more efficiently and ergonomically with an extendable conveyor positioned at a comfortable height to minimize twisting, straining and wasted steps.

## **MOTORIZED ROLLER CONVEYOR**

Convey items up to 75 pounds with reduced cost, space requirements, energy consumption and noise. The modular design uses a motorized roller to power each segment, enabling easier customization.

## **BELT DRIVEN LIVE ROLLER CONVEYOR**

Transport or regulate the flow of packages with zero-pressure contact accumulation, allowing product to gently coast to a stop, touching the product ahead without back-pressure.

## **BELT CONVEYOR**

Enable seamless product flow with pulleys designed to smoothly transition small products and self-aligning belt take-up for fast initial belt tensioning that takes just seconds.

## **LINESHAFT CONVEYOR**

Convey fragile goods without damage in this non-contact accumulation conveyor system, featuring zero-pressure zones to avoid contact between delicate products.

## **INDUCTION CONVEYOR**

Precisely separate packages and increase or decrease gaps between goods for more effective scanning, labeling and other processing to achieve low-cost, high-throughput induction.

## MAINTAIN

- Inspections & recommendations
- Maintenance execution
- Peak readiness & support
- Reliability & asset management
- Parts storeroom management

## OPTIMIZE

- Production performance
- Operator effectiveness
- Control tuning
- Training

## SUPPORT

- 24/7 tech support
- Emergency response
- Remote monitoring
- Spare parts
- Documentation

## MODIFY

- Expansions
- Technology refresh
- Mechanical replacement
- Obsolescence remediation

## ABOUT MHS

Founded in 1999, MHS Global is a full-service provider of innovative material handling systems that solve the challenges of distribution and fulfillment operations. We take a comprehensive, customer-centric approach that includes custom engineering, design, manufacturing and turnkey integration services. Our quality solutions leverage a broad range of controls and automated equipment, including but not limited to sorters, conveyors, extendable loading and unloading systems. We provide complete, responsive support to maintain systems for peak performance, with predictive analytics and local technicians to maximize long-term value and return on investment.

MHS has a global installed base of over \$6.5 billion for small to large projects in a variety of industries, including e-commerce, distribution and fulfillment, parcel, third party logistics and outside integrators.
