

MHS INFORMATION SECURITY MANAGEMENT

MHS has developed an Information Management System to protect our data and our customers' data and ensure our systems are available for the business.

MHS Information Security Management System Policy:

MHS is committed to the security of our data and our Customers' data. We provide a highly secure IT environment that is founded on sound business processes and continuous improvement. We aggressively comply with appropriate information security laws, controls, contracts and regulations. MHS is committed to the confidentiality, integrity, and appropriate availability of all our information assets.

The MHS Information Security Management System Objectives:

1. To implement secure policies and procedures that protect MHS' and customers' data.
2. To instill customer confidence in MHS' ability to protect and manage highly sensitive information.
3. To consistently deliver highly secure MHS services to our customers.
